REPLACEMENTS FOR:
*SPRAGUE *DALE *MURATA

SIP and DIP Resistor Networks manufactured to your specifications can incorporate mixed resistor values, tolerance and TC. Pin row centers are .100 inch on IC burn-In DIP.

Networks can include diodes, capacitors and other components as desired. Contact factory for resistance ranges versus other parameters.

Prototypes in days
No NRE Charges
Mixed Resistor Values
Any Number of Pins
Immediate Availability

PC Board Standoff
Location of Common Pins
Any Lead Spacing
Any Number of Common Pins
Others Available

ORDERING INFORMATION

RN	5	A	09	331	F	S
Resistor Network	Package: 5=SIP	Circuit Type	Number of pins	Resistor Values	Tolerance % a=.05, b=.10, c=.25, d=.5, f=1,g=5	Special Features

Transient Voltage Suppressor Arrays Available
